

## Sustainability Assignment

Complete a short essay 'Green and Sustainable Design' by addressing the following questions:

- *What are green, sustainable or recycled materials?*
- *Compare traditional materials with sustainable materials for engineering applications and discuss their impact in global, economic, environmental and societal contexts.*
- *Give an example of an engineering project and what other aspects besides materials should be considered for a sustainable design.*
- *What are some valuable insights we can gain from studying ancient sustainability practices.*

- 500-800 words/single line space/12pt/Times New Roman
